ATI - short Answer.

4. Role of Data centers.

- ⇒ Store data
- ⇒ Run cloud applications.
- ⇒ Provide security.
- ⇒ Ensure backup and availability.

5. IaaS, PaaS, SaaS, XaaS

IaaS: Virtual Infrastructure.

Ex: Amazon EC2

PaaS: Platform for development.

Ex: Google App Engine

SaaS: Ready to use software

Ex: Google Docs.

XaaS: Any IT service over the int

Ex: Microsoft Azure.

Result:

These enabled scalable cloud platforms like AWS, Azure, and Google cloud.

3. Server Virtualization and Difference.

Role:

Server virtualization creates multiple virtual machines on one physical server, improving resource utilization.

Difference:

Virtualization:

Technology to create virtual machines.

cloud computing:

Delivers IT services over internet.

1. cloud computing and characteristics
cloud computing is the delivery of
computing services over the internet on a
pay-as-you-use basis.

characteristics

- => on demand self service
- => Broad network access
- => Resource pooling.
- => Rapid elasticity.

2. Evolution of cloud computing.

- => Better hardware and servers.
- => Virtualization technology
- => High-speed internet.
- => Web-based software (saas)
